Configuring Windows Live Mail for Office 365

1. Open **Windows Live**.
2. If this is the first time you have started the program, the mail setup wizard will automatically start. If not, click the **Accounts** tab and then click the **Email** button on the left.

3. Fill in the requested fields:
 - **Email address:** This is your full e-mail address, for example s.ibis@miami.edu
 - **Password:** This is the password for your e-mail account.
 - **Display name for your sent messages:** Your name.
4. Click **Next**.

5. In the Configure server settings window, enter the following e-mail server information:
 - Incoming server information
 - **Server type:** Select **IMAP** from the drop down.
 - **Server address:** outlook.office365.com.
 - Check the box next to **Requires a secure connection (SSL)**.
 - **Authenticate using:** Select **Clear text**.
 - **Logon user name:** Enter your email address (e.g. s.ibis@miami.edu).
 - Outgoing server information
 - **Server address:** smtp.office365.com.
 - Check the box next to **Requires a secure connection (SSL)**.
 - **Port:** 587.
 - Check the box next to **Requires authentication**.
6. Click **Next** when done.

Windows Live Mail

Configure server settings

If you don't know your email server settings, contact your ISP or network administrator.
