Clearing Your Browser's Cache

If you are having difficulty accessing certain University websites or logging into your University account, it may be a result of your internet browser's cache. The cache contains stored information the browser may use to quickly access a certain site in the future. Clearing a web browser's cache will delete the saved information and force a fresh copy of the site or the site's content to download.

To clear the cache, please follow the steps below for your respective browser.

Chrome

Please visit Chrome's [Clear cache & cookies](#) article.

Safari

Please visit the Apple articles below:

- [Clear your browsing history in Safari on Mac](#)
- If the issue persists, follow the "Remove stored cookies and data" steps on [Manage cookies and website data in Safari on Mac](#)

Firefox

Please visit Firefox's [How to clear the Firefox cache](#) article.

Microsoft Edge

Please visit Microsoft's [View and delete browser history in Microsoft Edge](#) article.

Internet Explorer

Please visit Microsoft's [View and delete your browsing history in Internet Explorer](#) article.
